Quick guide for Baha® sound processor users

**Cochlear™ Wireless Mini Microphone 2 / 2+**

Benefits of your Cochlear Wireless Mini Microphone

Hear better over a distance and in noisy listening situations, such as:

- dining at a restaurant
- in meetings
- participating in a class at the gym
- in schools and classrooms
- when travelling by car, bus or train

**How to:**

Give the microphone to the person you want to listen to and ask them to position it close to their mouth by placing it vertically on their clothing using the clip on the back. Then activate streaming on your Baha sound processor.

**Get started**

Check with your hearing healthcare professional whether your sound processor has been paired with your microphone. Previously paired sound processors do not need to be paired again.

If your sound processor is not pre-paired, see below for instructions on how to easily pair it with your microphone.

**Tip!** Make sure that your sound processor volume is comfortably adjusted before you change the settings with the volume control on the microphone.

**Charge the battery**

Charge the battery for at least 3 hours before using your microphone for the first time, even if the battery indicators indicate it is fully charged. The charger can be connected overnight; the battery cannot be overcharged.

**Note:** On average, the microphone will operate for up to 10 hours between charges. Battery life may vary depending on use.

**Hear the TV or radio better**

**How to:**

Place the microphone by the TV speaker or radio. No need to plug it into a head phone outlet.
Quick guide for Baha® sound processor users

**Cochlear™ Wireless Mini Microphone 2 / 2+**

---

**Pair with sound processor**
You can pair up to three Cochlear streaming devices with your Cochlear sound processor. Select a separate channel for each device paired with the sound processor.

1. **Turn off your Cochlear sound processor.**
2. **Press the pairing button once (twice for channel 2, three times for channel 3) using the tip of a pen or similar object.** The status LED will flash yellow and the device will be in pairing mode for 20 seconds.

---

**Using your Cochlear Wireless Mini Microphone**

**Start streaming**
1. Turn on the microphone and your sound processor.
2. Press and hold the wireless streaming/program button on your sound processor for about three seconds.

When streaming is activated, an audible melody or a flashing light (depending on the type of sound processor) will be followed by streamed audio via the microphone.

**Start streaming from a second or third Cochlear Wireless Accessory**
If your sound processor is paired with more than one streaming device simply press and hold the wireless streaming/program button a 2nd or 3rd time to access the 2nd or 3rd Cochlear streaming device.

**Stop streaming**
Press the wireless streaming/program button on your sound processor. This will return the sound processor to the last program used.

**Mute**
1. To mute the signal press the mute button. The mute LED will flash yellow while muted.
2. To unmute the signal press the mute button again.

**Note:** Restarting the microphone while muted will unmute the signal.
Additional features of the Mini Microphone 2+

Telecoil (TC)
From the built-in Telecoil, receiving audio from an induction loop system (available at some theatres, schools, churches, etc.).

FM
From an external FM receiver attached via the FM connector. To use this mode, insert a Europin DAI or FM receiver into the FM connector.

Line-in
From an external audio source (smartphone, tablet, laptop, TV, etc.) attached via the Line-in connector. To use this mode, insert the included jack cable into the Line-in connector and plug the other end of the jack cable into the AUDIO OUT on the external audio device.

Change mode
To view the current mode of operation press the mode button once. The corresponding mode LED on the backside of the microphone will light up. To change the mode of operation press the mode button again and repeat until the desired mode is obtained.

Note:
• Line-in and FM Modes can only be selected if a cable or FM receivers are inserted into the microphone.
• The microphone will automatically switch into Line-in Mode when inserting a mini-jack plug.
• The microphone will automatically switch into FM Mode when inserting an FM or DAI receiver.

Stream audio to your sound processor

How to:
Insert one end of the supplied jack cable into the socket of the microphone and the other end into the AUDIO OUT of your audio device, such as a computer, MP3 player or hi-fi.
